# SECURE YOUR EMPLOYEES HOME OFFICES DURING THE COVID-19 CRISIS

F-Secure extends the evaluation period for business product licenses to 90 days to help customers to work from home offices

The recent coronavirus outbreak is causing great challenges for people around the world. Many companies are recommending remote work for their employees instead of commuting to the office. Often, the remote work has to be done with private computers that increase the company's security exposure. We have already seen many phishing campaigns and cyber attacks seeking to exploit coronavirus fears.

F-Secure®

# FREE LICENSES FOR HOME OFFICES

F-Secure is providing free additional 90-day licenses for selected corporate products for existing customers to secure their employees' home offices. Manage the security of your remote office fleet to make sure the remote work does not pose additional risk to your IT.

You can order free licenses for additional users until 31st of May 2020.

**Please contact your local partner to order.**

**STAY SAFE AND HEALTHY**

# RECOMMENDED PRODUCTS TO SECURE YOUR HOME OFFICES

**F-SECURE PROTECTION SERVICE FOR BUSINESS:**
F-Secure Protection Service for Business is designed to solve challenging business security needs. All your remote workers' computers and mobiles are protected against cyber threats with award-winning best protection to stop cyber threats, including ransomware. The product updates itself automatically so you don't have to worry about keeping your mobile fleet up to date. With cloud-native deployments, you do not need to invest in server hardware, software, or maintenance.

**F-SECURE RAPID DETECTION & RESPONSE:**
Our Endpoint Detection and Response (EDR) provides contextual visibility to quickly identify advanced threats and respond fast with automated or guided response actions backed by F-Secure experts. The product identifies suspicious activities by collecting and correlating behavioral events beyond commodity malware. The product is managed with the same management console as Protection Service for Business and it is deployed with the same installation package to minimize the additional steps needed for end users.
